

**Regulation for The Use Restriction and Labeling
Requirement of 2'-fucosyllactose Produced by Genetically
Modified *Escherichia coli* strain K-12 DH1 MDO
MAP1001d as a Food Ingredient**

MOHW Food No.1101301211, 16 June 2021

Article 1

The regulation is prescribed in accordance with the provisions of Paragraph 2 of Article 15-1 and Subparagraph 10 of Paragraph 1 of Article 22 of the Act Governing Food Safety and Sanitation.

Article 2

The 2'-fucosyllactose (2'-FL) referred to herein is produced by fermentation process using genetically modified *Escherichia coli* strain K-12 DH1 MDO MAP1001d (hereinafter referred to as “*E. coli* K-12 MAP1001d”). The 2'-FL powder can be purified from the fermentation broth via a sequence of purification steps including ion removal, activated charcoal treatment, filtration, concentration, crystallization with acetic acid, solid-liquid separation, washing and drying etc. The final 2'-FL powder shall not contain any genetically modified microorganism and its transgenes.

Article 3

For use as a food ingredient, the 2'-FL produced by *E. coli* K-12 MAP1001d shall comply with the following requirements:

1. Specifications listed in the Appendix.
2. Can only be used for infant formula, follow-up infant formula and milk powder or similar products for children under 7 years old.
3. The maximum level of 2'-FL is 1.2 g/L in the final product ready for use marketed as such or reconstituted as instructed by the manufacturer.

4. The container or external packaging of 2'-FL produced by *E. coli* K-12 MAP1001d shall be displayed one of the following information:
“The 2'-fucosyllactose is produced by genetically modified microorganism” or “The 2'-fucosyllactose is produced by genetically modified microorganism, but ultimately does not contain any genetically modified microorganism and its transgenes”.
